SUMMARY

I'm a B.Tech Second year student .Deeply interested in solving real world problem using ML,AI and Deep Learning techniques. Proficient with Python programming and Machine learning algorithms .I would like to contribute my knowledge towards the welfare of the society. And would like to explore more in the ever growing field of Artificial Intelligence. And very much interested in solving coding problems and participating in coding competitions and Hackathons

EDUCATION**School of Engineering and Technology, Jain University****2019 -
2023**

B.Tech(Artificial Intelligence)

CGPA/Aggregate: **8.6****TECHNICAL
SKILLS****Data Structures, Machine Learning, Java(intermediate), Python,
C++****EXPERIENCE****Verzeo****May 2020 - July 2020***ML Engineer Intern*

Build various model using Machine Learning techniques with great accuracy

Worked with computer vision project using deep Learning and greatly inspired on it.

Built social distancing and mask detector

PROJECTS**COVID-19 Face Mask Detector**

This model is created using computer vision and deep learning techniques.

This can detect whether a person is wearing face mask.

It can help to check employees are wearing mask or not.
